Statement by the Executive Board and Board of Directors on the annual report

We have on this day presented the annual report for the financial year 01.01.24 - 31.12.24 for SafeEx Holding ApS.

The annual report is presented in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the company's assets, liabilities and financial position as at 31.12.24 and of the results of the company's activities for the financial year 01.01.24 - 31.12.24.

The annual report is submitted for adoption by the general meeting.

Aalborg, March 27, 2025

To the capital owners of SafeEx Holding ApS**Opinion**

We have audited the financial statements of SafeEx Holding ApS for the financial year 01.01.24 - 31.12.24, which comprise income statement, balance sheet and notes to the financial statements, including material accounting policy information. The financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion the financial statements give a true and fair view of the company's financial position at 31.12.24 and of the results of the company's operations for the financial year 01.01.24 - 31.12.24 in accordance with the Danish Financial Statements Act.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We are independent of the company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Management's responsibilities for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Danish Financial Statements Act and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless management either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

- Plan and perform the audit of the financial statements to obtain sufficient appropriate audit evidence regarding the consolidated financial information of the entities or business units as a basis for expressing an opinion on the financial statements. We are responsible for the direction, supervision and review of the audit work performed. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other interest expenses	7,864	3
Other financial expenses	13,823	11,084
Total	34,985	26,616

4. Share capital

Treasury shares consist of:

	Quantity	Percent of capital
Holding of treasury shares as at 01.01.24	15,523	10%
Holding of treasury shares as at 31.12.24	15,523	10%

5. Contingent liabilities

Recourse guarantee commitments

The company has provided a guarantee for group enterprises' debt to credit institutions. The guarantee is unlimited. The group enterprises' debt to the credit institutions concerned amounts to thousand DKK 3,440 at the balance sheet date.

The company resigns in favor of credit institutions for any obligation that SafeEx has or will have towards credit institutions.

Other contingent liabilities

The company is taxed jointly with the other Danish companies in the group and has joint, several and unlimited liability for income taxes and any obligations to withhold tax at source on interest, royalties and dividends for the jointly taxed companies. The liability also includes any subsequent corrections to the calculated tax liability as a consequence of changes made to the jointly taxable income etc.

6. Accounting policies

GENERAL

The annual report is presented in accordance with the provisions of the Danish Financial Statements Act (*Årsregnskabsloven*) for enterprises in reporting class B with application of provisions for a higher reporting class.

The accounting policies have been applied consistently with previous years.

In accordance with section 110 of the Danish Financial Statements Act, the company has not prepared consolidated financial statements.

Basis of recognition and measurement

Income is recognised in the income statement as earned, including value adjustments of financial assets and liabilities. All expenses, including depreciation, amortisation, impairment losses and write-downs, are also recognised in the income statement.

Assets are recognised in the balance sheet when it is probable that future economic benefits will flow to the company, and the value of such assets can be measured reliably. Liabilities are recognised in the balance sheet when it is probable that future economic benefits will flow from the company, and the value of such liabilities can be measured reliably. On initial recognition, assets and liabilities are measured at cost. Subsequently, assets and liabilities are measured as described for each item below.

On recognition and measurement, account is taken of foreseeable losses and risks arising before the date at which the annual report is presented and proving or disproving matters arising on or before the balance sheet date.

INCOME STATEMENT

Gross loss

Gross loss comprises raw materials and consumables and other external expenses.

Costs of raw materials and consumables

Costs of raw materials and consumables comprise raw materials and consumables used for the year as well as any changes in inventories, including any inventory wastage.

Write-downs of inventories of raw materials and consumables are also recognised under raw materials and consumables to the extent that these do not exceed normal write-downs.

6. Accounting policies - continued -**Other external expenses**

Other external expenses comprise administrative expenses

Income from equity investments in group enterprises and associates

For equity investments in equity investments in subsidiaries, measured using the equity method, the share of the enterprises' profit or loss is recognised in the income statement after elimination of unrealised intercompany profits and losses and less any goodwill amortisation and impairment losses.

Dividends from equity investments measured at cost are recognised as income in the financial year in which the dividend is declared.

Income from equity investments in equity investments in subsidiaries and associates also comprises gains and losses on the sale of equity investments.

Other net financials

Interest income and interest expenses etc. are recognised in other net financials.

Tax on profit/loss for the year

The current and deferred tax for the year is recognised in the income statement as tax on the profit/loss for the year with the portion attributable to the profit/loss for the year, and directly in equity with the portion attributable to amounts recognised directly in equity.

The company is jointly taxed with Danish consolidated enterprises. The parent is the administration company for the joint taxation and thus settles all income tax payments with the tax authorities.

In connection with the settlement of joint taxation contributions, the current Danish income tax is allocated between the jointly taxed enterprises in proportion to their taxable incomes. This means that enterprises with a tax loss receive joint taxation contributions from enterprises which have been able to use this loss to reduce their own taxable profit.

6. Accounting policies - continued -**BALANCE SHEET****Equity investments in group enterprises and associates***Equity investments in group enterprises*

Equity investments in subsidiaries are recognised and measured according to the equity method. For equity investments in subsidiaries, the equity method is considered a measurement method, and reference is made to the 'Equity method' section for further details.

Equity investments in associates

Equity investments in associates are measured in the balance sheet at cost less any impairment losses. Transaction costs directly attributable to the acquisition are recognised in the cost of equity investments.

Equity method

On initial recognition, equity investments measured according to the equity method are measured at cost. Transaction costs directly attributable to the acquisition are recognised in the cost of equity investments.

Under subsequent recognition and measurement of equity investments according to the equity method, equity investments are measured at the proportionate share of the enterprises' equity value, determined according to the accounting policies of the parent, adjusted for the remaining value of goodwill and gains and losses on transactions with the enterprises in question. Equity investments, where information for recognition according to the equity method is not known, are measured at cost.

For equity investments measured according to the equity method, the proportionate share of the equity investments' equity value is determined according to the accounting policies of the parent, stated in the other sections. Equity value is also based on the following accounting policies:

6. Accounting policies - continued -

Intangible assets

Development projects are recognised in the balance sheet where the project aims at developing a specific product or a specific process, intended to be produced or used, respectively, by the company in its production process. On initial recognition, development projects are measured at cost. Cost comprises the purchase price plus expenses resulting directly from the purchase, including wages and salaries directly attributable to the development projects until the asset is ready for use. Interest on loans arranged to finance development projects in the development period is not included in the cost. Other development projects and development costs are recognised in the income statement in the year in which they are incurred.

Development projects are subsequently measured in the balance sheet at cost less accumulated amortisation and impairment losses

Completed development projects are amortised using the straight-line method based on useful lives, which are stated in the 'Amortisation and impairment losses' section.

Gains or losses on the disposal of intangible assets are determined as the difference between the selling price, if any, less selling costs and the carrying amount at the date of disposal

Gains or losses on disposal of equity investments

Gains or losses on disposal of equity investments are determined as the difference between the disposal consideration and the carrying amount of net assets at the time of sale, including non-amortised goodwill, as well as the expected costs of divestment or discontinuation. Gains and losses are recognised in the income statement under income from equity investments.

Impairment losses on fixed assets

The carrying amount of fixed assets which are not measured at fair value is assessed annually for indications of impairment over and above what is reflected in depreciation and amortisation.

If the company's realised return on an asset or a group of assets is lower than expected, this is considered an indication of impairment.

If there are indications of impairment, an impairment test is conducted of individual assets or groups of assets.

If dividends are distributed on equity investments in associates exceeding the year earnings from the enterprise in question, this is considered an indication of impairment.

6. Accounting policies - continued -

The assets or groups of assets are impaired to the lower of recoverable amount and carrying amount.

The higher of net selling price and value in use is used as the recoverable amount. The value in use is determined as the present value of expected net cash flows from the use of the asset or group of assets as well as expected net cash flows from the sale of the asset or group of assets after the expiry of their useful lives.

Impairment losses are reversed when the reasons for the impairment no longer exist.

Cash

Cash includes deposits in bank account.

Equity

The net revaluation of equity investments measured according to the equity method is recognized in the net revaluation reserve in equity according to the equity method to the extent that the carrying amount exceeds the cost.

Acquisition costs and consideration for treasury shares as well as dividends therefrom are recognised directly in equity under retained earnings.

Current and deferred tax

Current tax payable and receivable is recognised in the balance sheet as tax computed on the basis of the taxable income for the year, adjusted for tax paid on account.

Joint taxation contributions payable and receivable are recognised as income tax under receivables or payables in the balance sheet.

6. Accounting policies - continued -

Deferred tax liabilities and tax assets are recognised on the basis of all temporary differences between the carrying amounts and tax bases of assets and liabilities. However, deferred tax is not recognised on temporary differences relating to goodwill which is non-amortisable for tax purposes and other items where temporary differences, except for acquisitions, have arisen at the date of acquisition without affecting the net profit or loss for the year or the taxable income. In cases where the tax value can be determined according to different taxation rules, deferred tax is measured on the basis of management's intended use of the asset or settlement of the liability.

Deferred tax assets are recognised, following an assessment, at the expected realisable value through offsetting against deferred tax liabilities or elimination in tax on future earnings.

Deferred tax is measured on the basis of the tax rules and at the tax rates which, according to the legislation in force at the balance sheet date, will be applicable when the deferred tax is expected to crystallise as current tax.

Payables

Long-term payables are measured at cost at the time of contracting such liabilities (raising of the loan). The payables are subsequently measured at amortised cost where capital losses and loan expenses are recognised in the income statement as a financial expense over the term of the payable on the basis of the calculated effective interest rate in force at the time of contracting the liability.

Short-term financial payables are measured at amortised cost, normally corresponding to the nominal value of such payables. Other short-term payables are measured at net realisable value.
