STATEMENT BY BOARD OF DIRECTORS AND BOARD OF EXECUTIVES

The board of directors and board of executives have today presented the consolidated and parent annual report of Midt Factoring A/S for the financial year 1 January to 31 December 2024.

The annual report is presented in accordance with the Danish Financial Statements Act.

In our opinion, the consolidated and parent financial statements give a true and fair view of the company's assets, liabilities and financial position as per 31 December 2024. The financial report also reflects a fair view on the activities and financial result of the financial year 1 January to 31 December 2024.

The management's review contains in our opinion a true description of the items and activities covered in the review.

The board of directors and board of executives recommend the annual report for adoption at the Annual General Meeting.

INDEPENDENT AUDITOR'S REPORT

To the shareholders of Midt Factoring A/S

Opinion

In our opinion, the Consolidated Financial Statements and the Parent Company Financial Statements give a true and fair view of the financial position of the Group and the Parent Company at 31 December 2024, and of the results of the Group's and the Parent Company's operations as well as the consolidated cash flows for the financial year 1 January - 31 December 2024 in accordance with the Danish Financial Statements Act.

We have audited the Consolidated Financial Statements and the Parent Company Financial Statements of Midt Factoring A/S for the financial year 1 January - 31 December 2024, which comprise income statement, balance sheet, statement of changes in equity and notes, including a summary of significant accounting policies, for both the Group and the Parent Company, as well as consolidated statement of cash flows ("financial statements").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's Responsibilities for the Audit of the Financial Statements" section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Statement on the management commentary

Management is responsible for Management's Review.

Our opinion on the financial statements does not cover Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether Management's Review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, in our view, Management's Review is in accordance with the Consolidated Financial Statements and the Parent Company Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement in Management's Review.

Management's responsibilities for the consolidated financial statements and the parent financial statements

Management is responsible for the preparation of Consolidated Financial Statements and Parent Company Financial Statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Group or the Parent Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and the Parent Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the Consolidated Financial Statements and the Parent Company Financial Statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

MANAGEMENT'S REVIEW

Key figures

Key figure	Model of calculation	Key figure states
Equity ratio (%) =	$\frac{\text{Equity}}{\text{Balance sheet total}}$	Equity percentage compared to the total balance
Return on equity (%) =	$\frac{\text{Net profit/loss for the year} \times 100}{\text{Average equity}}$	The company's rate of return on capital invested in the company by the owners.

The consolidated values include the subsidiary MF Ejendom A/S, which was established in February 2010.

Objective

The objective of the company is administration, financing and discounting of invoices, with and without recourse, as well as financing and trade activity.

The company's main activities

The company develops and provides services aimed at facilitating trading between companies, both nationally and internationally. The services reduce the administrative, risk-related as well as financial tasks for the client companies.

Uncertainty in recognition and measurement

As part of the application of the company's accounting policies, a number of assessments and estimates has been made on how the future may impact the value of company's assets and liabilities. The estimates are based on appropriate, but unpredictable assumptions, and unexpected events may occur.

The assessment of the need for write-down of loans and receivables is based on objective indications of impairment, on the future ability to repay, and on assessments of the value of collaterals provided. It is management's assessment that all known factors at the year-end date have been taken into account for an assessment of the need for write-down at the end of the year, however, some factors are based on an estimate, and any losses ascertained subsequently may differ from the estimate made.

Intangible and tangible fixed assets are assessed to have a future value in use at least equivalent to the booked amounts.

Development in the company's activities

The company's operations during the financial year 2024, covering the period 1 January – 31 December is characterized by a satisfactory activity both among existing and new clients.

The activity in 2024 in Midt Factoring A/S has been at a high level and the demand for financing has been strong throughout the year

MANAGEMENT'S REVIEW

The consolidated result of the year after tax amounts to DKK 35.622 thousands, which is considered to be at a satisfactory level. The result is in accordance with our expectations presented in connection with the presentation of the Annual Report 2023. The balance sheet totals DKK 1.805.324 thousands. The equity, including dividend related to the year 2024 of DKK 35.000 thousands, equals DKK 130.490 thousands.

Significant events and expectations to the future

The company offers primarily three types of products:

- Recourse/non-recourse factoring with invoice management
- Recourse/non-recourse factoring without invoice management
- Invoice management without financing

The company's level of activity in terms of financial income is expected to be at the same level, compared to the level of 2024; a result before tax at a level in the range DKK 35,000 – DKK 45,000 thousands is expected.

Events after the balance sheet date

No events have occurred after the balance sheet date that may have a material influence on the assessment of the annual report.

Risks

The company's most significant risks are described below:

Market risk

The company's most significant operating risk is attached to the ability to be strongly positioned in the market for financing and administrative services, and to continue to be able to ensure competitive prices and a high service level.

Credit risks

The assets comprise primarily short-term accounts with customers.

The company's credit risks concern in all material respects accounts receivable where the credit risk corresponds to the recognized values. Clients, debtors and business partners are credit rated before a business relationship is opened, thus, the credit risk attached is as a normal business relationship.

Accounts with clients are hedged by security in debtor portfolios with good spread of risk, of which a large part is covered by credit insurance. The accounts with clients are therefore subject to moderate risk, in the opinion of the management.

Foreign exchange and interest risks

It is the company's policy to hedge foreign exchange and interest risks exposed to the company. The value of the company's assets and liabilities is assessed to be sensitive only to a limited extent to changes in the foreign exchange rates and interest rates.

MANAGEMENT'S REVIEW

Knowledge resources

The company's business foundation includes financing and management of account receivables as well as related matters. This makes especially high demands on knowledge resources and business processes.

In order to be able to provide these solutions continuously, it is decisive that the company can recruit and retain employees, both with a high educational level and employees with technical experience.

Development activities

The company continues the development of relevant products attached to the businesses' trade, nationally and globally, with special focus on financing, invoice management, risk management and collection procedures. Use of highly developed technology should all the time support the optimization of resource consumption in the companies that choose to outsource, in part or in full, the management of their debtor bookkeeping and in relation to compliance.

Investment in development of the ERP system has continued in 2024.

Ownership

The company is 100% owned by BPCE Factor, France.

ACCOUNTING POLICIES

The annual report of Midt Factoring A/S for 2024 has been presented in accordance with the provisions of the Danish Financial Statements Act for enterprises in reporting class C.

The annual report is presented in DKK thousands.

According to the Danish Financial Statements Act, Midt Factoring A/S has decided to present an Annual report on consolidated group level and only in English.

The accounting policies applied to these financial statements are consistent with those applied last year.

The main estimates of management are mentioned in a later paragraph in accounting policies "Estimation uncertainty - management's assessment".

RECOGNITION AND MEASUREMENT

Adjustment of accounts

As the company carries out financial activities, an adjustment of the accounts has been made with reference to § 11 of the Danish Financial Statements Act in order to give a true picture of the company's production and activities and accordingly the income statement and balance sheet have been adjusted to this fact.

Recognition and measurement in general

Income is recognized in the income statement as it is earned, and this includes the recognition of value adjustment of financial assets and liabilities. Costs, including amortizations and write-downs are also recognized in the income statement.

Assets are recognized in the balance sheet when it appears probable that future economic advantages will accrue to the company and the value of the asset can be measured reliably. Liabilities are recognized in the balance sheet when it appears probable that future economic advantages will flow from the company and the value of the asset can be measured reliably.

On initial recognition, assets and liabilities are measured at cost or amortised cost. Subsequently, assets and liabilities are measured as described under each item below.

Some financial assets and liabilities are measured at amortised cost whereby a constant, effective interest rate is recognized during the term. Amortised cost is calculated as the original cost with the deduction of any repayments and additions/deductions of the accumulated amortization of the difference between cost and nominal amount.

When carrying out recognition and measurement, account is taken of events that occur between the balance sheet date and the date of presenting the annual report and which provide or disprove circumstances that existed on the balance sheet date.

The carrying amount of intangible and tangible fixed assets is reviewed annually in order to determine whether there is an indication of impairment over and above what can be expressed as normal amortization. If this is the case, an impairment test is carried out and, if subsequently necessary, there is a write-down to the lower recoverable value.

ACCOUNTING POLICIES

CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements comprise (parent company) and the companies (affiliated companies) which are controlled by the parent company, cf. the group outline, page 7. The parent company is considered to have control when it directly or indirectly holds more than 50% of the voting rights, or when it, in some other way, may or actually does exercise dominant influence.

Consolidation principles

The consolidated financial statements are drawn up on the basis of financial statements of the (parent company) and its subsidiary companies. The completion of the consolidated financial statements is done by consolidating items of similar nature. At the consolidation, intra-group income and expenses, intra-group balances and dividends as well as gains and losses on transactions between the consolidated companies are eliminated. The financial statements used for the consolidation are prepared in accordance with the group's accounting policies.

In the consolidated financial accounts, the accounting items of the subsidiary companies are included 100%.

Capital investments in the subsidiary companies are offset against the proportionate part of the net assets of the subsidiary companies at the time of acquisition calculated at fair value.

INCOME STATEMENT

Interest income and expenses

Interest income and expenses arising from interest bearing financial instruments carried at amortised cost are recognized in the income statement using the effective interest method on the basis of the cost of the financial instrument. Interest includes amortization of fees that are an integral part of the effective yield on a financial instrument, including origination fees, and amortization of any other differences between cost and redemption price.

Interest income and expenses include interest on financial instruments carried at fair value.

Revenue recognition of interest on loans with individual write-down for impairment is based on the written down value.

Income from and expenses for services provided over a period of time, for example guarantee commission and fees for invoice administration, are accrued over the period. Transaction fees, for example domestic and foreign transfers, are recognized as income/cost on completion of the transaction.

Staff and external expenses

Salaries, wages and other remuneration which are expected to be paid for work carried out during the year, are recognized as Staff and administrative expenses. The expense includes salaries and wages as well as holiday allowances, anniversary bonuses, pensions etc.

Write-down of loans

Includes losses on and write-downs of loans, which are not re-insured.

ACCOUNTING POLICIES

Tax

Calculated current and deferred tax on the profit for the year and subsequent adjustments of tax charges for previous years are recognized in the income statement. Income tax for the year is recognized in the income statement on the basis of the tax laws applying in Denmark.

Tax attributable to equity transactions is recognized directly in equity.

Midt Factoring A/S is taxed jointly with the subsidiary of Midt Factoring A/S, MF Ejendom A/S.

BALANCE SHEET

Property, plant and equipment and Intangible assets

Cost includes the acquisition cost and costs directly connected with the acquisition up to the date on which the asset is ready to be used. Cost also includes estimated costs for demolishing and disposing of the asset and re-establishment to the extent that these costs are recognized as an obligation.

The cost of an asset is divided into separate components that are amortised individually if their useful life differs.

Subsequent costs of replacing components are recognized as tangible fixed assets when it appears probable that they will lead to future economic advantages. The carrying amount of the replaced components is recognized in the income statement. All other costs for repairs and maintenance are recognized in the income statement as they are paid.

The basis of amortization is cost with the deduction of the expected residual value after the end of the asset's useful life. Residual value is re-evaluated annually.

Straight-line amortization is carried out on the basis of the following evaluation of the asset's expected useful life and subsequent residual value:

	Useful life	Residual value
Intangible assets	3-5 years	0 % of cost
Operating equipment	3-5 years	0 % of cost
Leasehold improvements	3-5 years	0 % of cost
Buildings	20 years	65 % of cost

Estimated useful lives and residual values are reassessed annually.

Profits or losses on sales of tangible fixed assets are calculated as the difference between the net proceeds when sold and the carrying amount on the date of the sale. Profits or losses are recognized in the income statement under other operating income and other operating expenses.

ACCOUNTING POLICIES

Equity investments and securities

Bonds, shares and other equity investments are measured at fair value.

Fair value is established in accordance with the following order of priorities:

- Market-based sales value if a well-functioning market can be found
- Approximate sales value calculated as the relevant capital in use relevant to the security if a relevant capital in use can be calculated with the help of generally recognized valuation models and techniques
- Cost

The above means

- that listed shares and bonds are measured at market price,
- that unlisted shares and equity investments are measured at approximate sales value or cost

Equity investments in subsidiaries

Equity investments in subsidiaries are recognized and measured using the equity method, implying that the capital share measured at the pro-rata share of the subsidiary's booked value, plus or minus amortized respectively positive or negative goodwill and adding/subtracting any unrealized gains/losses from intercompany transactions.

In the profit and loss statement, the pro rata share of the subsidiary's net result after elimination of any unrealized intercompany profits or losses is included, plus or minus the amortization of goodwill.

The value of investments in subsidiaries is transferred to reserves using the equity method included in equity

Investment in subsidiary is written down to recoverable amount if this is lower than carrying value.

Loans and trade receivable

Loans and accounts receivable include invoice discounting.

Loans are measured at fair value at first recognition with addition of transaction costs and with deduction of fees received etc. which usually corresponds to nominal value. Subsequently loans are measured at amortised cost, in accordance with the effective interest method.

All loans are individually tested continuously for the need for write-down on the basis of fixed objective indicators of impairment.

If unutilized granted credits are assessed to present a credit risk, they will be included in the above test for need for write-down. Write-down of unutilized granted credits are recognized as provision for liabilities.

Write-down and carry-back of the year of previously made write-down are recognized in the income statement.

Prepayments and accrued income

Prepayments recognized under assets include expenses paid regarding the following accounting year. Prepayments are measured at cost price.

ACCOUNTING POLICIES

Financial liabilities

Financial debts are recognized by debt assumption at the received proceeds, the principal amount with the deduction of transaction costs paid. During subsequent periods, financial liabilities are recognized at amortised cost corresponding to the capitalized value with the use of the effective interest method. Loan costs are therefore recognized in the income statement over the term of the loan.

Payments received under prepayments are recognized under liabilities, which is income regarding the subsequent years.

Provisions

Provisions include expected expenses for deferred tax.

Provisions are recognized when it appears probable on the balance sheet date that the liability will mean drawing on the company's economic resources and that the amount on the liability can be calculated reliably.

Deferred tax

Deferred tax is calculated in accordance with the balance sheet liability method on all temporary differences between the carrying amount and the tax base value of assets and liabilities. Deferred tax is recognized in the balance sheet under Deferred tax assets and Deferred tax liabilities on the basis of the current tax rates.

However, deferred tax of temporary differences concerning non-tax deductible goodwill and other items, where temporary differences have occurred at the date of acquisition without having effect on the earnings or taxable income is not recognized. For those cases in which tax value declaration is applicable according to specific taxation rulings, the deferred tax is computed based on planned management application of the asset or, where applicable, liquidation of liabilities.

Tax assets relating to unutilized losses and tax deduction are contained in deferred tax only, if it is likely that such losses and tax deduction can be utilized.

Deferred tax is measured on the basis of the tax rules and the tax rates that will be applicable under the legislation on the balance sheet date when the deferred tax is expected to be paid as current tax. Changes in deferred tax as a consequence of adjusted tax rates are recognized in the income statement.

Dividends

Dividends are recognized as a liability in the accounts on the date when the general meeting has adopted this, and the company has thereby taken on an obligation. The Board of Executives' proposal for a dividend for the current accounting year is therefore part of equity and information on this is provided in the note on equity.

Translating foreign currency

Receivables, debt and other monetary items in foreign currency that have not been settled on the balance sheet date, are translated at the exchange rate current on the balance sheet date. The difference between the exchange rate on the balance sheet date and the exchange rate on the date of the origin of the receivable or the debt is recognized in the income statement.

ACCOUNTING POLICIES

Derivative financial instruments

Derivative financial instruments are initially recognized in the balance sheet at cost and are subsequently measured at fair value. Positive and negative fair values from derivative financial instruments are recognized in other receivables, other debt respectively.

Changes in the fair value of derivative financial instruments classified as hedging instruments and meeting the criteria for hedging the fair value of a recognized asset or liability are recognized in the income statement together with changes in the value of the hedged asset or liability.

For derivative financial instruments, which do not meet the criteria for treatment as hedging instruments, changes in fair value are recognized in the income statement as they arise.

Estimation uncertainty - management's assessment

As part of the company's application of the accounting policies, it has been assessed and estimated how the future may influence the value of the company's assets and liabilities.

The estimation is based on appropriate, however unpredictable assumptions, and unexpected events may occur. The special risks are mentioned in Management's Review.

Tangible assets are likewise assessed to have a replacement cost exceeding the carrying amount.

Cash flow statement

The cash flow statement shows the company's cash flow for the year distributed between operating activities, investment activities, and financing activities for the year, the change in liquidity for the year, and liquid assets at the beginning and end of the year.

No separate cash flow statement has been prepared for the parent company, as this is included in the group cash flow statement.

The cash flow from operating activities is calculated as the profit or loss for the year adjusted for non-cash operating items, changes in working capital, and corporation tax. Paid tax is presented as a separate item under operating activities.

The cash flow from investment activities includes payments in connection with buying and selling fixed assets and cash flow in connection with buying and selling companies and activities. The cash flow from financing activity includes changes in the amount or composition of share capital and the costs connected with this, raising loans and repayments on loans that are not included in working capital, the payment of dividends, and buying and selling own shares.

Cash at bank and cash equivalents comprise cash.

Off-setting

Outstanding amounts and debts are offset when the company has a legal right to offset the recognized amounts and at the same time intends to settle net or realize the asset and at the same time meet the obligation.

Investments in group enterprises comprise:
MF Ejendom A/S, Nygade 111, 7430 Ikast is 100% owned
by Midt Factoring A/S

NOTES

Note 8 - Prepayments

Prepayments include periodic adjustments made for various cost types eg. insurance costs, licences (software), leasing.

Note 9 - Deferred tax

GROUP	2024	2023
	DKK '000	DKK '000
Deferred tax beginning of year		
Included in the Income statement	433	582
	139	-149
Deferred tax end of year	572	433

Deferred tax is mainly related to development costs, with a booked value higher than the value in the fiscal balance.

Note 10 - Deferred income

Deferred income includes periodic adjustments made for factoring commission income, invoiced but not yet earned.

Note 11 - Currency exposure

The company utilizes standard forward contracts in order to secure its position against fluctuations in the different foreign currencies.

	Receive- ables	Payables	Hedging/ FX contracts	Net position 2024
	DKK '000	DKK '000	DKK '000	DKK '000
EUR (duration 0-3 months)	466.519	-418.436	-48.154	-71
GBP (duration 0-3 months)	15.105	-10.782	-4.317	6
NOK (duration 0-3 months)	116.912	-113.627	-3.269	16
SEK (duration 0-3 months)	126.305	-119.783	-6.579	-57
USD (duration 0-3 months)	78.458	-66.059	-12.393	6
Other (duration 0-3 months)	5.773	-	-5.739	34
Total	809.072	-728.687	-80.451	-66

As of 31 December 2024, the unrealized fair value adjustment of the Hedging transactions amounts to -224 k DKK. In the Profit and Loss statement the amount is included in Value adjustments and in the balance sheet it is included in the Trade receivables.

Receivables and payables disclosed above are based on the hedged position as of 31 December 2024. Consequently, incoming payments settled after the time of hedging will reduce both receivables and payables, without impacting the FX contracts or the net position.

NOTES

Note 12

Contingencies etc.

Contingent assets and contingent liabilities

The group/parent has entered into an IT contract. The obligation has a total value of approximately 0,3 mill. DKK. (0,6 mill. DKK)

The group/parent has entered into an operational leasing of company cars. The obligation has a total value of approximately 0,9 mill. DKK. (0,3 mill. DKK)
