Statement by Management on the annual report

The Board of Directors and the Executive Board have today discussed and approved the annual report of OnRobot A/S for the financial year 1 January - 31 December 2024.

The annual report has been prepared in accordance with the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and the parent company financial statements give a true and fair view of the financial position of the Group and the Parent Company at 31 December 2024 and of the results of their operations and consolidated cash flows for the financial year 1 January - 31 December 2024.

Further, in our opinion, the Management's review gives a fair review of the matters discussed in the Management's review.

We recommend that the annual report be approved at the annual general meeting.

Independent auditor's report

To the shareholders of OnRobot A/S

Opinion

We have audited the consolidated financial statements and the parent company financial statements of OnRobot A/S for the financial year 1 January – 31 December 2024, which comprise income statement, balance sheet, statement of changes in equity and notes, including accounting policies, for the Group and the Parent Company, and a consolidated cash flow statement. The consolidated financial statements and the parent company financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and the parent company financial statements give a true and fair view of the financial position of the Group and the Parent Company at 31 December 2024 and of the results of the Group's and the Parent Company's operations as well as the consolidated cash flows for the financial year 1 January – 31 December 2024 in accordance with the Danish Financial Statements Act.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the consolidated financial statements and the parent company financial statements" (hereinafter collectively referred to as "the financial statements") section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with requirements and the IESBA code.

Management's responsibilities for the financial statements

Management is responsible for the preparation of consolidated financial statements and parent company financial statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Group or the Parent Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

Independent auditor's report

As part of an audit conducted in accordance with ISAs and additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- ▶ Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- ▶ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent Company's internal control.
- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- ▶ Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and the Parent Company to cease to continue as a going concern.
- ▶ Evaluate the overall presentation, structure and contents of the financial statements, including the note disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.
- ▶ Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the group financial statements and the parent company financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Statement on the Management's review

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review provides the information required under the Danish Financial Statements Act.

Independent auditor's report

Based on the work we have performed, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement of the Management's review.

Financial ratios are calculated in accordance with the recommendations of the Danish Finance Society.

The financial ratios stated under "Financial highlights" have been calculated as follows:

Current ratio	$\frac{\text{Non-fixed assets} \times 100}{\text{Short-term liabilities}}$
Cash conversion ratio	$\frac{\text{Free cash flow before acquisitions} \times 100}{\text{Operating profit (EBIT)}}$
Equity ratio	$\frac{\text{Equity excl. non-controlling interests, year-end} \times 100}{\text{Total equity and liabilities, year-end}}$
Return on equity	$\frac{\text{Profit/loss for the year excl. non-controlling interests} \times 100}{\text{Average equity excl. non-controlling interests}}$

Management's review

Principal activities

OnRobot's main activity is the development, manufacturing and sale of end-of-arm tooling, software, and complete application solutions for collaborative robotic applications.

Development in activities and financial matters

OnRobot reported a loss for the year 2024 of EUR 7,143 thousand, and equity amounts to EUR -14,961 thousand at 31 December 2024.

In December 2024 investors secured funding through further issuance of convertible loans. As a part of the issued convertible loans the lenders have agreed to further loans totalling of EUR 5,422 thousand, to be paid out in three tranches during 2025 to 2027.

If the convertible loans, including those issued in December 2024, are converted into share capital, the equity will be largely reestablished, with the remaining part of share capital expected to be recovered through future positive operations.

Over the past few years, OnRobot has initiated and successfully implemented significant initiatives to improve the company's profitability. This is an ongoing process that remains a key focus.

OnRobot has a policy where ongoing development costs are recognized immediately in the income statement rather than being capitalized. This accounting practice means that OnRobot does not add significant intangible assets to its balance sheet for ongoing research and development activities impacting net income and equity.

During 2024, the robotics industry has experienced a slowdown in the market, which as a matter of course also has affected OnRobot A/S.

The expectations for 2024 were a result after tax within the range of EUR -6 million to -12 million. Realized figures are in line with expectations for 2024.

For the coming year, the company's management expects an increase in activity through the company's own operations. As the company is still in a build-up phase with significant investments in new products and the market, management expects losses for the coming year.

Outlook

The result after tax for the coming year is expected to be within the range of -6 mill and -12 mill EUR.

Currency risks

OnRobot has a natural currency exposure, primarily in EUR but also in USD. OnRobot is therefore to some extent exposed to variations in exchange rates. OnRobot's foreign exchange policy is not to hedge such exposures.

Environment

OnRobot's products help provide better working conditions and increase worker safety, and the activities of OnRobot consisting of assembly and R&D activities, do not to a high degree impact the environment.

Research and development activities

OnRobot continues to invest in the continuous development of the Company's products and markets.

Subsequent events

With reference to note 3 the Company has in December 2024 secured convertible loans for totalling EUR 5,422 thousand, to be paid out in three tranches during 2025, of which EUR 2,500 thousand has been paid out in January 2025 and EUR 2,001 thousand has been paid out in May 2025.

No further material events have occurred after the end of the financial year.

Consolidated financial statements and parent company financial statements 1 January – 31 December

Notes

1 Accounting policies

The annual report of OnRobot A/S for 2024 has been prepared in accordance with the provisions in the Danish Financial Statements Act applying to medium reporting class C entities.

The accounting policies used in the preparation of the financial statements are consistent with those of last year.

Presentation currency

The financial statements are presented in Euro (EUR thousand).

Consolidated financial statements

Control

The consolidated financial statements comprise the Parent Company OnRobot A/S and subsidiaries controlled by OnRobot A/S.

Control means the power to exercise decisive influence over a subsidiary's financial and operating decisions. Moreover, the possibility of yielding a return from the investment is required.

In assessing whether the Parent Company controls an entity, de facto control is taken into consideration.

The existence of potential voting rights which may currently be exercised or converted into additional voting rights is considered when assessing if an entity may become empowered to exercise decisive influence over another entity's financial and operating decisions.

The Management's review includes a group chart.

Preparation of consolidated financial statements

The consolidated financial statements are prepared as a consolidation of the Parent Company's and the individual subsidiaries' financial statements, which are prepared according to the Group's accounting policies. On consolidation, intra-group income and expenses, shareholdings, intra-group balances and dividends, and realised and unrealised gains on intra-group transactions are eliminated.

In the consolidated financial statements, the items of subsidiaries are recognised in full.

Business combinations

Newly acquired entities are recognised in the consolidated financial statements from the acquisition date. Comparative figures are not restated to reflect newly acquired entities.

The acquisition date is the date when the Group actually obtains control of the acquiree.

The purchase method is applied to acquisitions of new businesses over which the Group obtains control. The acquired businesses' identifiable assets, liabilities and contingent liabilities are measured at fair value at the acquisition date. Identifiable intangible assets are recognised if they are separable or arise from a contractual right. Deferred tax related to the revaluations is recognised.

Positive differences (goodwill) between, on the one hand, the consideration for the acquiree, the value of non-controlling interests in the acquired entity and the fair value of any previously acquired equity investments and, on the other hand, the fair value of the assets, liabilities and contingent liabilities acquired are recognised as acquired intangible assets under "Intangible Assets". Acquired intangible assets is amortised on a straight-line basis in the income statement based on an individual assessment of the economic life of the asset.

Consolidated financial statements and parent company financial statements 1 January – 31 December

Notes

1 Accounting policies (continued)

Upon acquisition, goodwill is allocated to the cash-generating units, which subsequently form the basis for impairment testing. Goodwill and fair value adjustments in connection with the acquisition of a foreign entity with a functional currency different from the Group's presentation currency are accounted for as assets and liabilities belonging to the foreign entity and are, on initial recognition, translated into the foreign entity's functional currency using the exchange rate at the transaction date.

Expenses incurred to acquire entities are recognised in the income statement in the year in which they are incurred.

If uncertainties regarding the identification or measurement of acquired assets, liabilities or contingent liabilities or the determination of the purchase consideration exist at the acquisition date, initial recognition will take place on the basis of provisional values. If it turns out subsequently that the identification or measurement of the purchase consideration, acquired assets, liabilities or contingent liabilities was incorrect on initial recognition, the statement will be adjusted retrospectively, including goodwill, until 12 months after the acquisition, and comparative figures will be restated. Subsequently, any adjustments are recognised as errors.

Intra-group business combinations

The book value method is applied to business combinations such as acquisition and disposal of equity investments, mergers, demergers, additions of assets and share conversions, etc. in which entities controlled by the parent company are involved, provided that the combination is considered completed at the time of acquisition without any restatement of comparative figures. Differences between the agreed consideration and the carrying amount of the acquiree are taken directly to equity.

Foreign currency translation

On initial recognition, transactions denominated in foreign currencies are translated at the exchange rates at the transaction date. Foreign exchange differences arising between the exchange rate at the transaction date and the rate at the date of payment are recognised in the income statement as financial income or financial expenses.

Receivables, payables and other monetary items denominated in foreign currencies are translated at closing rates. The difference between the exchange rates at the balance sheet date and the date at which the receivable or payable arose or was recognised in the latest financial statements is recognised in the income statement as financial income or financial expenses.

Foreign subsidiaries are considered separate entities. The income statements are translated at the average exchange rates for the month, and the balance sheet items are translated at the exchange rates at the balance sheet date. Foreign exchange differences arising on translation of the opening equity of foreign group entities at the exchange rates at the balance sheet date and on translation of the income statements from average exchange rates to the exchange rates at the balance sheet date are recognised directly in equity.

Foreign exchange adjustments of balances with separate foreign subsidiaries which are considered part of the total investment in the subsidiary are taken directly to equity. Foreign exchange gains and losses on loans and derivative financial instruments designated as hedges of foreign subsidiaries are also recognised directly in equity.

On recognition of foreign subsidiaries which are integral entities, monetary items are translated at the exchange rates at the balance sheet date. Non-monetary items are translated at the exchange rates at the acquisition date or at the date of any subsequent revaluation or impairment of the asset. Income statement items are translated at the exchange rates at the transaction date, although items derived from non-monetary items are translated at the historical exchange rates applying to the non-monetary items.

Consolidated financial statements and parent company financial statements 1 January – 31 December

Notes

1 Accounting policies (continued)

Income statement

Revenue

The Company has chosen IAS 11/IAS 18 as interpretation for revenue recognition.

On the conclusion of sales contracts which consist of several, separate sales transactions, the contract price is split up into the individual sales transactions based on the relative fair value approach. The separate sales transactions are recognised as revenue when the criteria for sale of goods, services or construction contracts are met.

A contract is split up into individual transactions when the fair value of each individual sales transaction can be calculated reliably and when each individual sales transaction has a separate value for the purchaser. Sales transactions are deemed to have a separate value for the purchaser when the transaction is individually identifiable and is usually sold separately.

Revenue is measured at fair value of the agreed consideration exclusive of VAT and taxes charged on behalf of third parties. All discounts and rebates granted are recognised in revenue.

Revenue from the sale of goods

Income from the sale of goods for resale and finished goods, is recognised in revenue when the most significant rewards and risks have been transferred to the buyer and provided the income can be measured reliably and payment is expected to be received. The date of the transfer of the most significant rewards and risks is based on standardised terms of delivery. Where sold goods are supplied and integrated with the purchaser's property on a current basis, the income is recognised in revenue as the goods are supplied, meaning that revenue corresponds to the selling price of work performed during the year.

Revenue from the sale of services

Income from the sale of services, which include software as a service, is recognised on a straight-line basis as the services are rendered.

Gross profit/loss

The items revenue, cost of sales and external expenses have been aggregated into one item in the income statement called gross profit in accordance with section 32 of the Danish Financial Statements Act.

Other operating income

Other operating income comprise items of a secondary nature relative to the Company's core activities including gains on the sale of fixed assets.

Cost of sales

Cost of sales includes the cost of goods used in generating the year's revenue.

External costs

External expenses include the year's expenses relating to the Company's core activities, including expenses relating to distribution, sale, advertising, administration, premises, bad debts, payments under operating leases, etc.

Consolidated financial statements and parent company financial statements 1 January – 31 December

Notes

1 Accounting policies (continued)

Staff costs

Staff costs include wages and salaries, including compensated absence and pension to the Company's employees, as well as other social security contributions, etc. The item is net of refunds from public authorities.

Profit/loss from investments in subsidiaries

A proportionate share of the underlying entities' profit/loss after tax is recognised in the income statement according to the equity method. Shares of profit/loss after tax in subsidiaries are presented as separate line items in the income statement. Full elimination of intra-group gains/losses is made for equity investments in subsidiaries.

Financial income and expenses

Financial income and expenses are recognised in the income statement at the amounts relating to the financial year. Financial income and expenses comprise interest income and expenses, gains and losses on securities, payables and transactions denominated in foreign currencies, amortisation of financial assets and liabilities as well as surcharges and refunds under the on-account tax scheme, etc.

Tax for the year

The tax expense for the year, which comprises the year's current tax charge, joint taxation contributions and changes in the deferred tax charge – including changes arising from changes in tax rates – is recognised in the income statement as regards the portion that relates to the profit/loss for the year and directly in equity as regards the portion that relates to entries directly in equity.

Balance sheet

Intangible assets

Acquired intangible assets

Acquired intangible assets comprise of acquisitions, costs directly related to the acquisitions and amortisation charges directly attributable to assets.

Acquired intangible assets that are recognised in the balance sheet are measured at cost less accumulated amortisation and impairment losses.

Acquired intangible assets are amortised on a straight-line basis over the estimated useful life. The amortisation period is usually 5 years.

Patents and licences are measured at cost less accumulated amortisation and impairment losses. Patents are amortised on a straight-line basis over the remaining term of the patent, and licences are amortised over the term of the licence, however not exceeding 5 years.

Gains and losses on the disposal of acquired intangible assets including patents and licences are determined as the difference between the selling price less costs to sell and the carrying amount at the date of disposal. Gains and losses are recognised in the income statement as other operating income or other operating expenses, respectively.

Consolidated financial statements and parent company financial statements 1 January – 31 December

Notes

1 Accounting policies (continued)

Property, plant and equipment

Land and buildings, plant and machinery and fixtures and fittings, tools and equipment are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated.

Cost comprises the purchase price and any costs directly attributable to the acquisition until the date when the asset is available for use. The cost of self-constructed assets comprises direct and indirect costs of materials, components, sub-suppliers, wages and salaries as well as borrowing costs relating to specific and general borrowing directly attributable to the construction of the individual asset.

Where individual components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items, which are depreciated separately.

Depreciation is provided on a straight-line basis over the expected useful lives of the assets. The expected useful lives are as follows:

Plant and machinery	3-10 years
Fixtures and fittings, other plant and equipment	3-5 years
Leasehold improvements	3-10 years

The basis of depreciation is based on the residual value of the asset and is reduced by impairment losses, if any. The depreciation period and the residual value are determined at the time of acquisition and are reassessed every year. Where the residual value exceeds the carrying amount of the asset, no further depreciation charges are recognised.

In case of changes in the depreciation period or the residual value, the effect on the amortisation charges is recognised prospectively as a change in accounting estimates.

Gains and losses on the disposal of items of property, plant and equipment are calculated as the difference between the selling price less costs to sell and the carrying amount at the date of disposal. Gains or losses are recognised in the income statement as other operating income or other operating expenses, respectively.

Leases

The Company has chosen IAS 17 as interpretation for classification and recognition of leases.

On initial recognition, leases for assets that transfer substantially all the risks and rewards incident to ownership to the Company (finance leases) are measured in the balance sheet at the lower of fair value and the net present value of future lease payments. In calculating the net present value, the interest rate implicit in the lease or the incremental borrowing rate is used as discount factor. Assets held under finance leases are subsequently accounted for as the Company's other assets.

The capitalised residual lease liability is recognised in the balance sheet as a liability, and the interest element of the lease payment is recognised in the income statement over the term of the lease.

All other leases are considered operating leases. Payments relating to operating leases and any other leases are recognised in the income statement over the term of the lease. The Company's total liabilities relating to operating leases and other leases are disclosed in contingencies, etc.

Consolidated financial statements and parent company financial statements 1 January – 31 December

Notes

1 Accounting policies (continued)

Investments in subsidiaries

Equity investments in subsidiaries are measured according to the equity method in the parent company financial statements. The Company has chosen to consider the equity method a consolidation method.

On initial recognition, equity investments in subsidiaries are measured at cost, i.e. plus transaction costs. The cost is allocated in accordance with the acquisition method; see the accounting policies regarding the consolidated financial statements above.

The cost is adjusted by shares of profit/loss after tax calculated in accordance with the Group's accounting policies less or plus unrealised intra-group gains/losses.

Identified increases in value and goodwill, if any, compared to the underlying entity's net asset value are amortised in accordance with the accounting policies in the consolidated financial statements. Negative goodwill is recognised in the income statement.

Dividend received is deduced from the carrying amount.

Net revaluation of equity investments is recognised under equity in the net revaluation reserve according to the equity method to the extent that the carrying amount exceeds cost.

Investments in deposits

Non-current receivables, which comprise deposits, are measured at amortised cost.

Impairment of fixed assets

The carrying amount of intangible assets, property, plant and equipment and equity investments in subsidiaries is tested annually for impairment other than the decrease in value reflected by amortisation/depreciation made.

An impairment test is conducted on individual assets or cash-generating units when there is indication of impairment. Write-down is made to the lower of the recoverable amount and carrying amount.

The recoverable amount is the higher of the net selling price of an asset and its value in use. The value in use is calculated as the net present value of the expected net cash flows from the use of the asset or the group of assets and the expected net cash flows from the disposal of the asset or the group of assets after the end of the useful life.

Previously recognised impairment losses are reversed when the reason for recognition no longer exists. Impairment losses on goodwill are not reversed.

Inventories

Inventories are measured at cost in accordance with the FIFO method. Where the net realisable value is lower than cost, inventories are written down to this lower value.

The cost of raw materials and consumables comprises the cost of acquisition plus delivery costs.

The cost of finished goods and work in progress includes the cost of raw materials, consumables, direct labour and production overheads. Indirect production overheads include the indirect cost of material and labour as well as maintenance and depreciation of production machinery, buildings and equipment and expenses relating to plant administration and management.

The net realisable value of inventories is calculated as the sales amount less costs of completion and costs necessary to make the sale and is determined taking into account marketability, obsolescence and development in expected selling price.

Consolidated financial statements and parent company financial statements 1 January – 31 December

Notes

1 Accounting policies (continued)

Receivables

The Company has chosen IAS 39 *Financial instruments* as interpretation for impairment write-down of financial receivables: *Recognition and measurement*

Receivables are measured at amortised cost.

An impairment loss is recognised if there is objective evidence that a receivable is impaired. If there is objective evidence that an individual receivable has been impaired, an impairment loss is recognised on an individual basis.

Impairment losses are calculated as the difference between the carrying amount of the receivables and the net present value of the expected cash flows, including the realisable value of any collateral received. The effective interest rate for the individual receivable or portfolio is used as discount rate.

Prepayments

Prepayments comprise expenses incurred concerning subsequent financial years.

Equity

Net revaluation reserve according to the equity method

Net revaluation of equity investments in subsidiaries is recognised at cost in the reserve for net revaluation according to the equity method.

The reserve can be eliminated in case of losses, realisation of equity investments or a change in accounting estimates.

The reserve cannot be recognised at a negative amount.

Translation reserve

The translation reserve comprises the share of foreign exchange differences from 1 January 2020 arising on translation of financial statements of entities that have a functional currency other than EUR, foreign exchange adjustments of assets and liabilities considered part of the Company's net investments in such entities. The reserve is dissolved on the sale of foreign entities. When equity investments in subsidiaries and associates in the parent company financial statements are subject to the limitation requirement in the net revaluation reserve according to the equity method, foreign exchange adjustments will be included in this equity reserve instead.

Consolidated financial statements and parent company financial statements 1 January – 31 December

Notes

1 Accounting policies (continued)

Corporation tax and deferred tax

Current tax payables and receivables are recognised in the balance sheet as tax computed on the taxable income for the year, adjusted for tax on taxable income in previous years and tax paid on account.

Deferred tax is measured using the balance sheet liability method on all temporary differences between the carrying amount and the tax base of assets and liabilities. However, deferred tax is not recognised on temporary differences relating to goodwill which is not deductible for tax purposes or on office premises and other items where temporary differences, apart from business combinations, arise at the date of acquisition without affecting neither the profit/loss for the year nor the taxable income. Where alternative tax rules can be applied to determine the tax base, deferred tax is measured based on Management's intended use of the asset or settlement of the liability, respectively.

Deferred tax assets, including the tax base of tax loss carry-forwards, are recognised at the expected value of their utilisation; either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity and jurisdiction.

Adjustment is made to deferred tax resulting from elimination of unrealised intra-group profits and losses.

Deferred tax is measured according to the tax rules and at the tax rates applicable in the respective countries at the balance sheet date when the deferred tax is expected to crystallise as current tax.

Convertible loans

Convertible loans are broken down into a liability element and an equity element based on the relevant instrument of debt. On initial recognition, the liability is recognised at the fair value of a similar liability without a conversion right. The remaining amount of the convertible loan is recognised as equity. On subsequent recognition, the liability is measured at amortised cost until converted or repaid. The equity element is not re measured after initial recognition.

Provisions

Provisions comprise anticipated costs related to warranties. Provisions are recognised when the Group has a legal or constructive obligation as a result of a past event at the balance sheet date, and it is probable that an outflow of the Company's resources embodying economic benefits will be required to settle the obligation. Provisions are measured at net realisable value or fair value. If the obligation is expected to be settled far into the future, the obligation is measured at fair value.

Warranty commitments include expenses for remedial action in respect of the contract work within the warranty period of 15 months. Provisions for warranty commitments are measured at net realisable value and recognised based on past experience.

Restructuring provisions comprise severance pay to employees, losses incurred due to the termination of contracts, etc. following Management's decision to restructure the Company. Restructuring provisions are recognised when it has been decided to restructure the Company and the restructuring process has been initiated.

Liabilities other than provisions

The Company has chosen IAS 39 *Financial instruments*: Recognition and measurement as interpretation for recognition and measurement of liabilities.

Other liabilities are measured at net realisable value.

Deferred income

Deferred income comprises payments received concerning income in subsequent years.

Consolidated financial statements and parent company financial statements 1 January – 31 December

Notes

1 Accounting policies (continued)

Special items

Special items comprise significant income and expenses of a special nature relative to the Company's revenue-generating operating activities. Special items may comprise expenses incurred for extensive restructuring of processes and basic structural adjustments as well as any related disposal gains and losses, that have a material impact over time. Special items also comprise significant one-off items that, in Management's opinion, do not form part of the Company's primary operating activities and that are deemed not to be recurring.

Cash flow statement

The cash flow statement shows the Group's cash flows from operating, investing and financing activities for the year, the year's changes in cash and cash equivalents as well as the Group's cash and cash equivalents at the beginning and end of the year.

The cash flow effect of acquisitions and disposals of entities is shown separately in cash flows from investing activities. Cash flows from corporate acquisitions are recognised in the cash flow statement from the date of acquisition. Cash flows from disposals of entities are recognised up until the date of disposal.

Cash flows from operating activities

Cash flows from operating activities are calculated as the Group's share of the profit/loss adjusted for non-cash operating items, changes in working capital and income taxes paid.

Cash flows from investing activities

Cash flows from investing activities comprise payments in connection with acquisitions and disposals of entities, activities and intangible assets, property, plant and equipment and financial assets.

Cash flows from financing activities

Cash flows from financing activities comprise changes in the size or composition of the Group's share capital and related costs as well as the raising of loans, repayment of interest-bearing debt, and payment of dividend to shareholders.

Cash and cash equivalents

Cash and cash equivalents comprise cash and short-term marketable securities with a term of three months or less which are subject to only minor risks of changes in value.

Consolidated financial statements and parent company financial statements

1 January – 31 December

Notes

2 Special items

Special items in 2023 relate to the restructuring of production activities in Hungary and the restructuring of sales activities in China. The expenses include severance pay to employees, losses on contracts incurred due to unutilized leasehold, and other related costs.

Special items for the year are specified below, including the line items in which they are recognised in the income statement.

In 2024 no special items have been recorded.

Notes

5 Staff cost (continued)

Total remuneration to group and parent Management:
EUR 419 thousand (2023: EUR 581 thousand).

Board of directors has been granted with totalling 95,000 warrants under Warrant Program 2024.

Non-subscribed warrants:

The Company has two incentive programs for Management, executive employees and the Board of Directors.

One program (Warrant Program 2018) with an Exercise Price on approx. 20.8 EUR for one A-share of nominal 1 DKK and one program (Warrant Program 2024) with an Exercise Price on approx. 3.33 EUR for one A-share of nominal 1 DKK.

If the warrant holder has received warrants related to the Warrant Program 2018 and Warrant Program 2024 and exercises under Warrant Program 2024, the warrant holder will not also be entitled to exercise warrants which the warrant holder has been granted in relation to the Warrant Program 2018.

The programs are vested over a period of 4 years with 25 % per year.

As at 31 December 2024 total warrants vested under Warrant Program 2018 is 184,333. There is following warrants to be vested in the future under Warrant Program 2018:

2025: 22,855 warrants

2026: 14,000 warrants

2027: 2,250 warrants

As at 31 December 2024 total warrants vested under Warrant Program 2024 is 99,912 There is following warrants to be vested in the future under Warrant Program 2024:

2025: 49,105 warrants

2026: 40,250 warrants

2027: 28,500 warrants

2028: 26,250 warrants

The following general criteria apply to the program:

1. Those who have received warrants have not paid for the warrants received.
2. There are no specific terms and conditions apart from continued employment in the Company or Board of Director.

The Company has granted 467,455 warrants that adjusted for conditions under Warrant Program 2024 amounts to 328,438 warrants with subscription right for one A-share of nominally DKK 1.

The board of directors has an outstanding amount of 1,340,053 warrants which can be issued in the period until 31 December 2026.

298,175 class B shares of DKK 1 each
5,606,167 class C shares of DKK 1 each

After 1 January 2024 class C shareholders are entitled, but not obliged, to require the company to redeem or repurchase all their class B and C shares including an annual accumulated interest rate of 4 % p.a. (added compound interest) from the date of subscription of class C shares. Redeem or repurchase is required to be within the framework of the Danish Companies act.

Reference is made to note 5 for information related to the warrant program.

The Company owns no treasury shares at the balance sheet date. Nor did it purchase or sell any treasury shares in the financial year.

Consolidated financial statements and parent company financial statements 1 January – 31 December

Notes

15 Provisions

Provisions consist of warranty commitments and other provisions.

The Group provides a 15-month warranty. A provision of EUR 82 thousand (2023: EUR 88 thousand) has been made for anticipated warranty claims based on historic experience of the level of repairs and returns.

Other provisions of EUR 0 (2023: 295 thousand) consists of cost related to restructuring.

Other debt	163	163	0	0
Convertible debt instruments	13,935	0	13,935	0
	14,098	163	13,935	0

17 Convertible debt instruments

The Group has issued convertible debt instruments totalling EUR 13,935 thousand. The debt instruments were issued as part of the Group's financial with an accrued interest of 25% as a flat rate on the date of disbursement. From 1 January 2025 the flat rate is adjusted to 30%.

The maturity date is 31 December 2027.

Upon disbursement of the loan and until 30 days after maturity, lead lender is entitled to demand that the loan is converted into new class D-shares.

D-shares carry one vote and have a preference to proceeds ahead of all other shares in the Company for an amount equal to five times the amount paid for the D-share.

The conversion rate per D-share of nominal DKK 1 is EUR 3.

18 Deferred income

Deferred income contains prepaid income relating to the following financial year.

19 Contractual obligations and contingencies, etc.

Contractual obligations Group

The Group has entered non-cancellable purchase agreements totalling EUR 1,708 thousand of which EUR 1,141 thousand are due within one year.

Contractual obligations Parent

The Company has entered non-cancellable purchase agreements totalling EUR 1,708 thousand of which EUR 1,141 thousand are due within one year.

Guarantees

The Group has not entered into any guarantee commitments.

Consolidated financial statements and parent company financial statements 1 January – 31 December

Notes

19 Contractual obligations and contingencies, etc. (continued)

Operating lease liabilities

The Group entities have entered into operating rent and lease arrangements with a lease payment within one year of EUR 689 thousand. The leases have a remaining term within 71 months and a total nominal residual lease liability of EUR 1,641 thousand.
